

YASH SHERIKAR

Java Backend Developer | Spring Boot & Microservices | REST APIs | AWS & Docker | CI/CD
Pune, Maharashtra 411057 | +91 8698011606 | yashsherikar1821@gmail.com | github.com/yashsherikar

PROFESSIONAL SUMMARY

Java Backend Developer with 2+ years of hands-on experience designing, developing, and deploying scalable, production-grade applications using Core Java (8/11), Spring Boot, and Microservices architecture. Proficient in building and consuming RESTful APIs, implementing JWT/OAuth2 security, and working with SQL and NoSQL databases (MySQL, PostgreSQL, MongoDB). Experienced with AWS cloud (EC2, IAM, S3), Docker containerization, CI/CD pipelines (Jenkins, GitHub Actions, Maven), and observability through structured logging. Strong understanding of OOP, SOLID principles, design patterns, and event-driven architecture (Kafka). Collaborative Agile team player with a passion for clean code, peer code reviews, and continuous improvement. MCA graduate with a 9.0 CGPA and hands-on fintech/payment domain experience.

WORK EXPERIENCE

Java Developer Intern | Hulk-Hire | Hyderabad

Feb 2025 – May 2025

- Designed and developed RESTful microservices using Java 11, Spring Boot (MVC, Integration, Security, JDBC) following layered architecture and SOLID principles for maintainability and scalability.
- Integrated Stripe and PayPal Payment Gateways with encrypted transaction handling; implemented JWT authentication and role-based authorization via Spring Security.
- Investigated and resolved production-level API failures through code review and debugging; provided fixes and workarounds to maintain existing software solutions.
- Improved API and database performance through query optimization, indexing, and connection pooling in MySQL, reducing response times significantly.
- Deployed and monitored applications on AWS EC2 (Linux) using Log4j/SLF4J structured logging; managed CI/CD pipelines with Git/GitHub, Maven, and Jenkins.
- Wrote JUnit unit tests and used SonarQube for code quality enforcement; validated APIs via Postman before every release.
- Participated in Agile Scrum ceremonies (JIRA, Confluence), peer code reviews, and cross-functional collaboration to ensure quality and timely delivery.

Freelance Software Developer | Self-Employed | Remote

Jul 2024 – Present

- Designed and delivered end-to-end backend services using Spring Boot, Spring Integration, and Microservices — owning the full SDLC from design through cloud deployment on AWS.
- Built and optimized secure RESTful APIs with input validation, global exception handling, versioning, and OpenAPI/Swagger documentation.
- Designed MySQL database schemas achieving a 30% performance improvement through indexing strategies and query tuning; worked with MongoDB for document storage requirements.
- Developed a Tap-and-Pay Payment System with AES end-to-end encryption, JWT-secured APIs, role-based access control, and audit logging.
- Implemented Kafka-based event-driven messaging between microservices; containerized services with Docker and managed CI/CD pipelines on AWS EC2.

Web Developer Intern | LogiBit | Sangli

Jan 2024 – Jun 2024

- Developed web application modules using PHP, MySQL, HTML, and CSS; improved SQL query performance by 40% through targeted optimization and indexing.
- Built real-time data modules improving operational efficiency by 30%; demonstrated initiative and a continuous improvement mindset.

KEY PROJECTS

Smart Email Assistant (AI-Powered Chrome Extension)

- Built a Spring Boot REST API backend generating AI-based email replies, handling 100+ requests/min via Java multithreading, input validation, and structured logging — deployed on AWS EC2 with 99.9% uptime.

- Enforced code quality with SonarQube and JUnit/Mockito tests; used GitHub Copilot and Claude AI assistants for accelerated, high-quality delivery.

School/College Bus Payment System (Freelance)

- Delivered a secure Java/Spring Boot tap-and-pay backend with AES encryption, JWT auth, RBAC, Kafka event logging, and optimized MySQL queries — production-grade fintech implementation.
- Designed modular service-layer architecture following OOP and SOLID principles; documented API contracts with OpenAPI/Swagger for easy integration.

AI Chatbot — Small AI Assistant

- Built an intent-based chatbot backend with context-aware response logic and multilingual support; improved user engagement by 40% through iterative performance improvements.

TECHNICAL SKILLS

Languages	Java (Primary — 8/11), Python (basic), JavaScript, C, C++, PHP
Spring Ecosystem	Spring Boot, Spring MVC, Spring Data JPA, Spring Cloud, Spring Integration, Spring Security, Spring AOP, Spring JDBC
APIs & Architecture	RESTful APIs, Microservices, GraphQL, Event-Driven Architecture, OpenAPI/Swagger, Postman, API Design & Versioning
Messaging	Kafka, RabbitMQ (familiar), Async & Event-Driven Patterns
Databases	MySQL, PostgreSQL, MongoDB, Oracle DB (familiar), Query Optimization, Indexing, Spring Data JPA, Transactions
Security	JWT, OAuth2, Spring Security, RBAC, AES Encryption, Secure Coding, Input Validation
Cloud & Infra	AWS (EC2, IAM, S3, SQS, SNS, Lambda — familiar), Docker, Kubernetes (familiar), Linux (Ubuntu), Cloud-Native Patterns
CI/CD & DevOps	Jenkins, GitHub Actions, GitLab CI, Git, GitHub, Bitbucket, Maven, Gradle, SonarQube, Docker
Testing	JUnit, Mockito, Integration Testing, Code Coverage, TDD (familiar), Postman, SonarQube
Observability	Log4j, SLF4J, ELK (familiar), OpenTelemetry (familiar), Structured Logging, Production Monitoring
Frontend (basic)	HTML5, CSS3, JavaScript
Process & Tools	Agile Scrum, JIRA, Confluence, Code Reviews, SDLC, OOP, SOLID, Design Patterns, System Design
AI Tools	GitHub Copilot, Claude, Cursor

EDUCATION

Master of Computer Applications (MCA)

CGPA: 9.0 / 10

Bharati Vidyapeeth Kolhapur (Pune University), Maharashtra | Graduated: 2025

Bachelor of Computer Applications (BCA)

CGPA: 8.48 / 10

Bharati Vidyapeeth Sangli (Pune University), Maharashtra | Graduated: 2023

CERTIFICATIONS & RECOGNITION

- Postman API Certification – Postman
- Java Certification – Infosys, HackerRank, Learn Tube
- The Complete Beginner's Guide to Generative AI – Udem
- Coding Bootcamp (Java) – Let's Upgrade
- Guest Lecturer – Delivered technical lectures on Core Java & software development practices at multiple colleges, bridging academic theory with industry-relevant engineering skills.
